

## The History of Triple-I

- Triple-I provides tailored **Knowledge Management, Business Process and Information Technology** consulting solutions for Government and Commercial clients striving to improve organizational performance.
- Triple-I is a privately held, small business headquartered in the Kansas City area.
- As a company, our focus is on the creation and delivery of value through services and solutions that are unique to our clients' needs.
- We help our clients achieve lasting value, the kind of value associated with increased competitive advantage through improved operations, and successful project implementations.
- For nearly forty years, the Triple-I team has been committed to **delivering results that matter** for our clients nationwide.

## Our CORE Purpose

To achieve results that matter for:

- Our Clients
- Our Partners
- Our Associates
- Triple-I

## Our CORE Values

- To have integrity in everything we do
- To be trustworthy and dependable
- To enable people to grow
- To be financially strong
- To risk intelligently
- To improve continuously

## Knowledge Management

- The primary business value of Knowledge Management (KM) is to ensure that executives and their teams make informed, timely decisions leveraging business intelligence and operational expertise.
- We assist our clients in creating value through knowledge through collaboration that ensures the efficient and timely flow of tacit and explicit information across the enterprise.
- Knowledge Assessment & Strategy
- Knowledge Mapping & Capture
- Knowledge Sharing & Synthesis

## Delivery Management

- In today's increasingly complex business environment with more projects, less resources, tight budgets and shrinking timelines companies are challenged to deliver projects and programs on time and within budget that meet the business needs of the organization. We help our clients succeed in delivering projects and programs on time and within budget that meet the goals and objectives defined by the organization.
- Project Management
- Program Management

## Software Development

- Our 40 years of software development experience with literally hundreds of clients in the government and commercial space allows us to draw upon the collective knowledge of our organization to design and implement software solutions for our clients that meet their business needs and yield immediate results.
- Based on our extensive experience in designing knowledge-rich software, we have defined a leading practice Software Development Lifecycle (SDLC) methodology that defines the activities required to take a software development project from concept to completion. Our iterative experiential approach addresses the breadth of brand, business collaboration, knowledge value, and technical requirements. At each stage in the lifecycle we have stringent quality assurance activities that provide numerous opportunities for validation and verification by our team and yours.

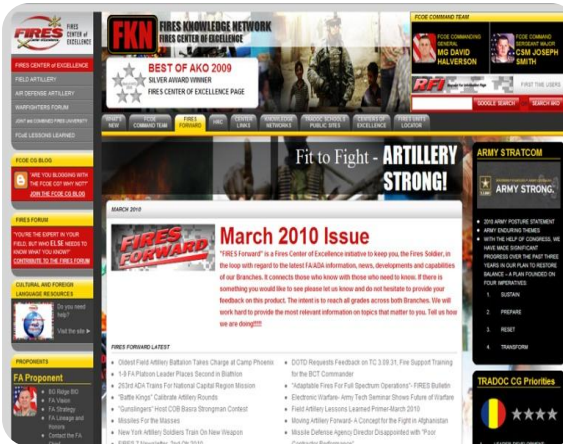

## IT Managed Services

- Managed Services is the practice of transferring day-to-day related responsibility for all or components of your IT infrastructure to a business partner as a strategic method for improved performance. We help our clients realize improved performance and achieve lasting value through improved IT operations, predictable costs, reliable results and measurable performance improvements.
